

PANDIYARAJAN S

Senior Python Software Engineer | Backend & API Specialist

+91 6382320439 | pandiyarajans372@gmail.com | [linkedin.com/in/pandiyarajans](https://www.linkedin.com/in/pandiyarajans) | pandiyarajan-portfolio.vercel.app

PROFESSIONAL SUMMARY

Results-driven Python Software Engineer with almost 5 years of experience designing, developing, and deploying scalable enterprise applications and RESTful APIs across international clients in the US, UK, and Singapore. Proven expertise in **Python, Django, Flask, FastAPI**, and microservices architecture. Strong background in **AI-integrated product development, Certificate Lifecycle Management, and cloud-native deployments** using AWS, Docker, and Kubernetes. Experienced in Agile/Scrum environments, collaborative cross-functional teams, and delivering production-ready systems that reduce cost and manual effort at scale.

TECHNICAL SKILLS

Languages	Python, JavaScript
Frameworks	FastAPI, Django, Flask, React.js
Databases	PostgreSQL, MongoDB
Cloud & DevOps	AWS (S3, EC2, Lambda), Docker, Kubernetes, CI/CD Pipelines, Linux
AI / ML	NLP, Named Entity Recognition (NER), AI-assisted moderation & insights
Integrations	ServiceNow, JIRA, Slack, PagerDuty, MS Teams, BMC Remedy, RingCentral
Networking / PKI	Certificate Lifecycle Management, F5 LTM/GTM, Fortinet, Palo Alto, Infoblox
Developer Tools	Git, Postman, VS Code, PyCharm, JIRA, ServiceNow
Methodologies	Agile/Scrum, Microservices, RESTful API Design, System Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Entropik | Chennai, India

Oct 2025 – Present

Entropik is an AI-powered consumer research platform. Led backend architecture for the Decode product suite.

- Led design and development of multiple backend product features using FastAPI, focusing on scalable architecture, performance optimization, and maintainability across 50+ microservices.
- Defined service boundaries and API contracts, enabling parallel frontend-backend development and reducing integration time.
- Engineered an AI-assisted moderated interview pipeline that auto-generates research insights, significantly reducing cost and eliminating manual moderation overhead.
- Improved production observability using structured logging and monitoring tools, measurably reducing incident resolution time.
- Collaborated directly with product stakeholders to gather requirements, refine feature scope, and align deliverables with business goals.
- Diagnosed and resolved critical production bugs under tight timelines, minimising downtime and ensuring service reliability.

Software Engineer

Servion Global Solutions | Chennai, India

Apr 2025 – Oct 2025

UCaaS/CCaaS implementation specialist supporting enterprise communications migrations.

- Completed structured training on RingCentral UCaaS & CCaaS solutions, gaining hands-on expertise in site creation, user/role/template management, IVR setup, call queues, ring groups, and number porting.
- Contributed to kickoff scripts, project documentation, and client presentations; gained direct exposure to enterprise onboarding and delivery processes.

Software Engineer

AppViewX | Coimbatore, India

Feb 2022 – Apr 2025

AppViewX is a global leader in certificate lifecycle management and network automation. Worked with enterprise clients across US, UK, and Singapore.

- Designed and delivered 100+ Python-based automation workflows for Certificate Lifecycle Management (CLM) covering discovery, creation, renewal, revocation, and expiry notifications — reducing manual intervention significantly.
- Built a Django-powered CLM system that streamlined certificate operations and boosted team productivity by 67%.
- Developed and containerized Flask-based microservice APIs to automate F5 LTM object provisioning (virtual servers, pools, nodes, monitors), improving deployment speed and reducing errors.
- Leveraged FastAPI to design and deploy secure, high-performance asynchronous APIs for production environments.
- Integrated cross-platform notification workflows across ServiceNow, JIRA, Slack, MS Teams, PagerDuty, and BMC Remedy, simplifying PKI and infrastructure monitoring.
- Built and fine-tuned an AI-powered chatbot using NLP and Named Entity Recognition (NER), improving user query resolution and end-user experience.
- Developed an internal AppViewX SDK that reduced API call failures and improved overall deployment stability.
- Collaborated with Product Owners on requirement gathering, effort estimation, and functional specs; coordinated cross-functional teams to deliver high-priority features on time.
- Proficient in AWS (S3, EC2, Lambda) for scalable deployment and serverless application management; experienced with SQL and MongoDB query optimization.

KEY ACHIEVEMENTS

- Most Valuable Player Award — AppViewX (Sep 2023): Recognized for exceptional delivery and team contribution.
- Circle of Excellence Award — AppViewX (Nov 2023): Awarded for consistently outstanding performance.
- Spot Award — AppViewX (Jan 2024): Recognized for rapid, impactful execution on a critical project.

EDUCATION

B.E. – Electronics and Communication Engineering

2018 – 2022

Mepco Schlenk Engineering College | Sivakasi, India

CGPA: 8.29 / 10.0

ADDITIONAL INFORMATION

- Open to relocation: Currently based in India; open to relocating internationally for the right opportunity.
- Work authorization: Currently on Indian passport; eligible to apply for skilled worker visas. Visa sponsorship required.
- Languages: English (Professional), Tamil (Native), French (Basic); willing to learn new languages as needed.
- Available for immediate / notice period joining.
